

TEST TOOL BOX Sampling Kit

DN-Micro's Sampling Kit comes as part of the Remote Testing Service, and contains everything your company will need to quickly and easily collect and send your fluid metalworking fluid samples ready for testing.

The Sampling Kit contains the following:

- 2ml sample containers with snap lock lids
- Disposable sampling pipettes
- Inner plastic postage sleeves
- Instructions for sampling
- Sample container holder (optional extra)
- Sample labels
- Self addressed postage bags
- Machine reference sheet

The sampling kits are delivered complete as part of the remote testing service, and are bespoke to your requirements based on the following criteria: No of machines, frequency of testing i.e. weekly, fortnightly, monthly, duration of service required i.e. 1,3,6,or 12 months
